Dr. Francis S. Collins, head of the Human Genome Project, is one of the world's leading scientists. He works at the cutting edge of the study of DNA, the code of life. Yet he is also a man of unshakable faith in God and scripture. He believes that faith in God and faith in science can coexist in a person and be harmonious. He explains his own journey from atheism to faith, and then takes his readers for a stunning tour of modern science to show that physics, chemistry, and biology can all fit together with belief in God and the bible.
